Re: Harlow Street emergency sewer repair specialized service (payment acceptance request)

---

The City of Bangor Sewer Department recently completed emergency sewer main replacements on Central, Center and Harlow Streets, with the help of Eastwood Contractors. Most of the sewer mains were excavated by conventional methods (open trench). A portion of the sewer main on Harlow and Central Street did not allow for conventional methods of excavation prompting the need for hydro-excavation. This was an unforeseen circumstance encountered while the project was already underway. Due to the intense amount of underground utilities and condensed construction schedule (night work), Allen's Environmental was contacted and stated they could meet our requests. They were able to provide services necessary to complete the project and start immediately working nights along with Eastwood Contractors and the Sewer Department.

The Bangor Sewer Department budgeted for such emergencies in FY15 in the Professional and Technical Services account (8003-73010000) and has sufficient funds to cover the service rendered. The Sewer Department is requesting approval to submit the invoice from Allen's Environmental for payment in the amount of \$24,195.00.

Thank you for your consideration.

Sincerely,

Sean Currier  
Collection System Manager
