Sanitarian, Code Enforcement
Bangor City Hall

ASBESTOS

Demolitions: Probably the single greatest source of asbestos exposure in Maine to the general public and tradespeople working in the general area are improperly conducted demolition projects. Demolition activities (the removal of any load bearing structure) require proper inspection, notification, and removal procedures.

Demolition Permits: The DEP is requesting help from Maine municipalities to battle the demolition problem because many demolitions go unreported and have the asbestos improperly removed. You are being given a notification form to complete and submit to DEP.

Asbestos - The permit holder needs to be able to answer "yes" to the following questions:

- * Has the area to be demolished been inspected by a DEP-licensed company
Yes _____ No _____ Who: _____
- * Have you sent a DEP (and EPA) notification form 10-days prior to starting?
Yes _____ No _____ Date: _____
- * Prior to demolition, has all asbestos been removed by a DEP-licensed company?
Yes _____ No _____ Who: _____
