From the LAWS & ORDINANCES
CITY OF BANGOR
CHAPTER 271 - ARTICLE V - STREET NUMBERS

Section 1 METHOD OF DESIGNATING STREET NUMBERS.

The City Engineer shall, from time to time, as the convenience of the public may require and as the City Council may direct, designate the numbers to be affixed to the buildings on the several streets, and squares in the City. In all the streets, the odd numbers shall be on the right-hand side and the even numbers on the left-hand side, in the progressive order of numbering.

271-25 RECORD OF STREET NUMBERS. The City Engineer shall, by the measurement of each street in the City, determine the correct number of every house or place of business and shall keep the same on file in a convenient manner for the reasonable use of the public at all times.

271-26 NOTIFICATION TO PROPERTY OWNERS. The City Engineer shall transmit, to the owner of every such building, a notice and statement giving the name of the street, the name of the owner, the name of the occupant and the number or numbers of the building together with instructions for procuring and affixing the same. The owner of the property shall, within sixty days after receiving said notice from the City Engineer, cause to be affixed to the main entrance of every house or place of business fronting the street, a metallic or other suitable number, at least one and one-half inches in height and situated so as to be plainly visible and legible at all times from the street.

271-27 PENALTY. Any person who shall affix or suffer to be affixed to, or shall allow to remain upon any building, a different number from the one designated by the City Engineer, or if any owner of any building or property, after receiving said notice from City Engineer, shall fail to comply with any of the provisions of this ordinance, he shall be fined not less than ten dollars, nor more than fifty dollars, and a like penalty for every day he shall neglect so to do after his first conviction.

NOTE: Place number where it can be easily seen.
